> Prompting with Picture This

Prompting comes in many different formats, and at Picture This we support them all.

We have prompting experience with everyone from sitting US presidents and Hollywood celebrities to average joes with no on-camera experience. The beauty of a prompter is that it can enable anyone to sightread like a pro.

Industry-standard equipment and veteran crew are always available. Our software is Mac-based and allows for easy script imports and changes.

>Teleprompters (Autocue)

Our teleprompter sizes range from the Autocue 17” to smaller, iPad-based systems that you can operate yourself. We have all the risers and adapters needed to use with a variety of cameras and video signals.

>EyeDirect Mark II

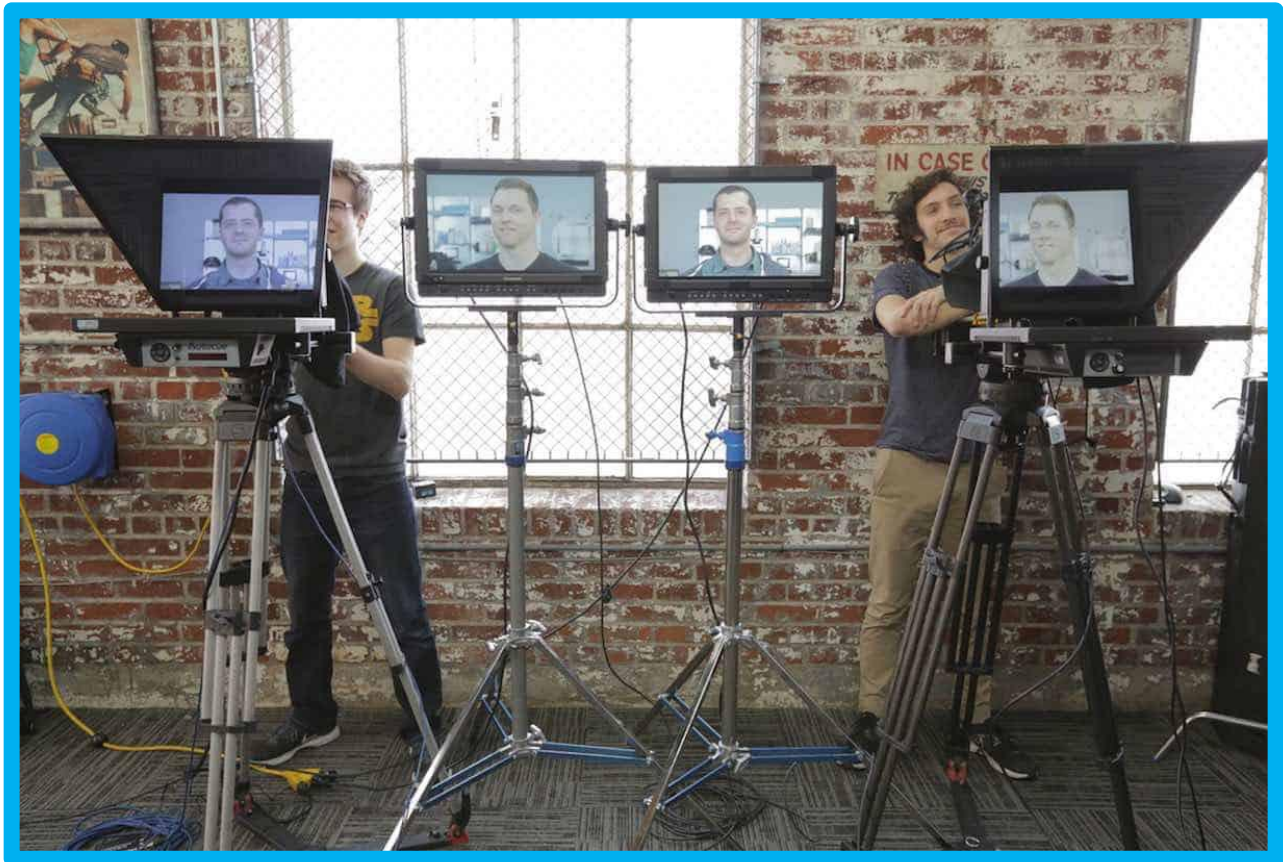

Give talent visual feedback and keep their eyeline straight to the lens. This is the tool that delivers consistent results for projects that require intimate interviews.

>Interrotron

Originally developed by documentarian Errol Morris, this system helps keep the eye line (especially with non-pro talent) and keeps everyone comfortably connected even if interviewer and interviewee are in different rooms or parts of the world.

>Executive/Speech Prompters

Yes, Mr. President, we have presidential-style prompters available. This executive speech prompter is designed to be unnoticed by the crowd, making the script invisible to the audience. With a flat LCD monitor base that projects upward and onto the glass, this prompter is small, sleek, and light weight for easy transportation and setup. Picture This also offers the best operators in the Northwest. A title held for 30 years, and 6 White House administrations.

>Off-camera Eyeline Prompting/Confidence Monitors

These monitors range from 37" up to 75" and can be placed on rolling stands or used as down-stage monitors. Projection screens are also available in any size, for script or PPT display in large room/live audience events. Perfect Cue and speaker timers in a variety of styles are also available.
